## Projects

---

### E-commerce multisite

Developed custom modules and worked with custom api developed to communicate between drupal and magento.

- **MULTILINGUAL**: English and Arabic
- **Magento** as a backend and Drupal for frontend.
- Responsive website built as a mobile-first.
- Developed **Rest API** service for mobile application and partially decoupled site.
- **Payment Gateway** integration.
- **Algolia** instant search with **React.js**

**Technologies**: Drupal 8, React.js, Magento, blt, drush, acquia cloud site factory, vagrant, xdebug, xhprof, solr, algolia, checkout.com

---

### Readhat.com

Support project for webstore development of redhat.

- **Patternlab** is heavily used in the site with drupal 7 to manage custom page developments.
- Worked with Pattern lab and pattern builder module Drupal 7
- Pattern Builder import performance improvement done as a new feature request.

**Technologies**: Drupal, drush, vagrant, xdebug

---

### IMMO-EUROPE.be

- A Belgium based Multilingual property holiday rental, sell and rent site, Wanted to redesign and improve functionality for their new site. With integration of **third party** property **databases** like vhrwin and fortissimmo.
- Primary integration support of third party databases with Drupal views without importing their table data
- Custom module development to create nodes for all vhrwin and fortissimmo properties database using migrate and views integration of those tables
- Developed custom responsive theme.
- Added support with multilingual with third party database

**Technologies**: Drupal, mysql, eva, views, migrate, xdebug
